1. In answer to a report requested by ref A of pictures taken of a UFO sighting, DMOC/NDOC contacted Base Operations Centre Edmonton (ref B). As per ref C, the Base Operations Officer contacted the photographer who bluntly told him she would get the picture if and whenever she had time to devote to that matter; that she had more pressing interests for the time being than to bother sending, for a second time, the negative for development. The first time the picture could not be developed.

2. It is recommended that the requestee be advised of the above. You are advised that NDOC will not pursue the case due to the photographer's negative response to our request.
